

FIRST AID POLICY

*The Currajong School takes a zero-tolerance approach to child abuse and is fully committed to ensuring that its strategies, policies, procedures, and practices meet all **Child Safe Standards as specified in Ministerial Order No. 1359 (2022)***

RATIONALE

All students have the right to feel safe and well and know that they will be attended with due care when in need of first aid. School staff (administration, teaching assistants, and casual relief staff) have a duty of care to a student to take reasonable care to avoid risk of injury that is reasonably foreseeable.

A staff member's duty of care is greater than that of an ordinary citizen in that the education staff member is obliged to assist an injured student. First aid is an important aspect when creating a safe environment where children are secure and able to feel confident.

The Currajong School is responsible for providing adequate first aid facilities and sufficiently trained staff. All staff and trained first aid personnel are required to provide first aid to students, staff, parents/carers and visitors.

GUIDELINES

All staff must:

- be familiar with the school's first aid procedures
- observe their duty of care to students by providing first aid treatment within the limits of their skill, expertise, training and responsibilities

The school will work to ensure any foreseen first aid needs are met by providing resources. This includes, but is not limited to resources such as:

- Asthma kits
- First aid room/Sickbay
- Portable first aid kits
- School EpiPens

The Currajong School will ensure that there are sufficient staff trained in first aid - HLTAID003 - Provide First Aid (where possible, all members of staff will be trained in first aid).

STAFF TRAINING

Regular training in 'Provide First Aid', asthma and anaphylaxis treatment will be undertaken by staff as per recommendations, regulations and as school needs require. The Currajong School maintains a register of all staffs up to date qualifications. This is maintained by the administration staff and first aid officer.

IMPLEMENTATION

- First aid shall be administered according to HLTAID003 Provide First Aid training and the Occupational Health and Safety Act 2004
- Students will be instructed to report all injuries or sickness to a staff member
- Minor injuries may be treated by the teacher/staff at the classroom level (i.e. small abrasions, cuts or scratches)
- If a student is too ill or injured to resume normal classroom activities, the parents/carers will be contacted for the child to be collected from school
- All visits to the first aid room/sickbay will be documented in the First Aid Register by the treating first aider
- In the case of severe injury, illness or medical condition, an ambulance will be called and then the parents/carers. When parents/carers are not contactable, emergency contact numbers will be called until direct contact is made
- All staff have the authority to call an ambulance immediately in an emergency. The Principal and Leadership must be notified. If the situation and time permit, a teacher may confer with others before deciding on an appropriate action.
- All head injuries must be documented in the first aid register by the treating first aider, and parents/carers are to be telephoned/informed
- The first aid room/sickbay will be monitored whilst occupied
- A portable first aid kit will accompany all excursions, along with a mobile phone
- Parents/carers shall be notified of all serious injuries as soon as practicable
- All serious injuries will be reported to the Principal, Assistant Principal and to the Health and Safety Representative
- All staff must record incidents and student injury on the Sentral School Management System 'First Aid Register'

EXISTING HEALTH CARE NEEDS

First aid requirements for students with identified health care needs should be explained in the student's 'Release Indemnity and Medical Authority' form, Asthma Plan or Anaphylaxis Management Plan. A current photo of the student and a description of their health care needs will be distributed to staff.

Protocols must be followed as per The Currajong School's *Medication Management Policy* for any medication which is required to be administered to a student.
